TURNING POINT

Entering three decades of fuel transition

DNV GL Conference supported by Lloyd's List
3 June 2019 (Monday)
Høyres Hus, Stortingsgata 20, 0161 Oslo

TURNING POINT

With the Global 2020 Sulphur Cap on the doorstep and the implications of the IMO GHG strategy on the horizon, the maritime community is at a turning point. Operators face big decisions on how to make their fleets compliant with upcoming regulations and keep them safe. At this year's DNV GL Conference at Nor-Shipping, we come together with the most important industry stakeholders to offer guidance on the most important questions surrounding the Global Sulphur Cap and alternative fuels.

- What are the risks associated with switching to new, compliant fuels in daily operations?
- How can companies ensure they are ready?
- What will the IMO ambitious decarbonization goals mean for shipping?
- And what could the fuel mix of the future look like?

These are some of the questions that will be addressed in our two panel discussions this year. Coming together to share insights is an essential part of what will make our community future-proof. We face tectonic shifts within maritime on three fronts: In the market, which is increasingly unpredictable, shifts in regulations, headed by the upcoming 2020 Sulphur Cap, and shifts in technology, driven by the constantly evolving nature of digitalization.

I look forward to discussing these issues with you personally and catching up at the 2019 DNV GL Conference!

Knut Ørbeck-Nilssen
CEO DNV GL - Maritime

AGENDA

10:00 REGISTRATION

11:00 CONFERENCE OPENING

Knut Ørbeck-Nilssen, CEO of DNV GL - Maritime
Richard Meade, Moderator, Managing Editor of Lloyd's List

11:15 PANEL 1 - GLOBAL SULPHUR CAP

Whether technical, operational or financial, there are several risks associated with the switch to compliant fuels. As we are quickly approaching the point of no return, the question is: Are you ready?

12:30 REFRESHMENTS

12:45 PANEL 2 - ALTERNATIVE FUELS

Ambitious, decarbonisation goals have been set. The shipping industry is entering into three decades of transformation, where different fuel options will be adopted. How will the multi-fuel reality change your business?

14:00 BREAK AND REFRESHMENTS

15.00 NOR-SHIPPING INNOVATION FORUM (LLOYD'S LIST)

17.30 DRINKS RECEPTION

19.00 END OF EVENT
